

Sew Precious In His Sight

Volume 14, Issue 2

April 2012

Prayers Answered

Sorry their will not be news letter again this time, due to some health issues.

I was diagnosed with melanoma on my face after having had a biopsy done on a place on my face December 5th, the lab report came back as being melanoma. Surgery was done on December 14th, the lab report came back that the surgery did not remove all of the melanoma. When I saw the oncology at the Mary Bird Cancer Center here in Baton Rouge. A CT and pet scan was done. The test showed that I will need a second surgery, after seeing a second surgeon I was scheduled for another surgery. At that time I didn't know how far the melanoma has spread. I stood on the promise if you ask in My name it will be done. For He is the great physician and He will heal me from the top of my head to the sole of my feet.

The MRI came back clear of any cancer in the brain, the Cat scan also came back clear, the Pet scan showed that ten lymph node showed some active. After the doctor met with a board of doctors they all agreed that they felt that the melanoma on the face was not connected to the lymph node. The decision was made however that when the surgery on the face was done to remove the melanoma that the lymph node should also be removed. I was then scheduled for surgery on Feb. 8th, I was told that the surgery would take half a day; I would be kept in the hospital a couple of days. From what I understand it is a very delicate surgery because of all the muscles, nerve and the carotid artery in the neck.

After the surgery I saw my doctor saying the all of the lymph node came back negative and that the tissue that was removed form my face had good clean margins. The Lord has shown mercy on me once again. Only by His grace had the melanoma had not spread. The place on my face had been there for over two years, it's not any reason that it had not spread, but God goes the glory.
